Summary

An experienced professional with a solid background in devising IT solutions for improved business efficiency. Highly focused on end user satisfaction through quality delivery of services. I thrive working in a fast pace environment that requires problem solving, implementing new ideas and delivering enhanced customer experience.

Experience

Application Analyst

Bolton Clarke

Dec 2018 - Present (3 years 9 months +)

Perform analysis of existing application protocols and software tools.

Develop automation processes using Python to reduce extensive manual processing to a short automated process.

Design and develop a new application architecture that supports business growth.

Provide and support recommendations for improved procedures and policies.

Provide application support in resolving and troubleshooting problems.

Assist and support in achieving departmental goals and objectives.

Provide advanced application support to utilise the system infrastructure and resources effectively.

Provide direct assistance to users in using and interpreting software tools and products.

Interact with software vendors to provide the best solutions to business problems.

Provide application support to other internal users and developers in handling multiple projects.

Ensure compliance with all security measures in application development processes.

Plan and implement application releases. In addition, I work with vendors and business stakeholders to evaluate new releases and guide the testing approach.

Ensure non-prod environments are configured and maintained systematically to conserve the integrity of the testing processes.

Provide data extraction and high-quality analysis on an ad-hoc basis to help inform critical business decisions and metrics.

Propose, Plan and Deliver changes efficiently by following ITIL methodologies, outlining potential risks and impacts on the user

Had work experience on MS SQL, Cloud Computing and hands on experience on AWS, Docker, Docker Containers, Kubernetes, Terraform, Prometheus, Grafana, Git, Jenkins.

Software Developer

MVP Studio

Jun 2018 - Nov 2018 (6 months)

MVP Studio is an incubator for software start-ups.

I worked on a Keys project, an Automated, Intelligent property investment platform.

Worked on C#, ASP.NET MVC, JIRA, HTML/JavaScript/React/CSS/ jQuery, SQL2012

Involved in Daily Stand-up meetings,

Involved in Keys project feasibility study and provided technical solutions.

I created a page that appears when a Tenant signs up for the first time. It has a form that gets the tenant's personal information.

Involved in project Sprints and completed assigned tasks.

Having experience in SDLC and Agile work environments

• HTML5 • Package Management • BUILD MANAGER • Continuous Integration and Continuous
Delivery (CI/CD) • Jenkins • DOCKER

Honors & Awards

Best Employee Award - AIA

Jul 2014

Got the best employee award for the month of May & June

Information Systems Security (INFOSEC) Professional - Cisco Systems, Inc.

Nov 2013

This recognition indicates confidence in the competency of my skills.

The NSTISSI (National Security

Telecommunications and Information Systems Security)

No. 4011 National Training Standard for Information

Systems Security (INFOSEC)

Professionals applies to all U.S. Government departments and agencies, as well
as

to its contractors. Therefore, this recognition will help me to meet current or
future Federal employment

requirements. In environments where these requirements

do not apply, I can use this recognition to

demonstrate that I possess the

knowledge and skills needed to oversee and protect critical information
infrastructures and networks

Best Customer Service Award / Smile Award - AIA

Apr 2015
